## Skills

---

**Programming Languages:** Java, C++, Python  
**Web Development:** HTML, CSS, JavaScript, Node.js, Express.js  
**Databases:** MySQL, MongoDB  
**Tools:** Git, GitHub, VS Code  
**Core CS:** Data Structures and Algorithms, Object-Oriented Programming, Computer Networks, Database Management Systems (DBMS)

## Projects

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |      |

| <b>Wanderlust — Airbnb-Inspired Full-Stack Web Application</b><br>GitHub <i>Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js</i>                                                                                                                                                                                                                                                                                                                                                            | 2026 |
| <ul style="list-style-type: none"><li>Developed a full-stack accommodation platform with CRUD operations for property listings using Express.js and MongoDB.</li><li>Implemented user authentication and authorization using Passport.js with session management and protected routes.</li><li>Designed Mongoose schemas for users, listings, and reviews with persistent data relationships.</li><li>Built a review and rating system supporting 1–5 star ratings and review management.</li></ul> |      |
| <b>IoT-Based Smart Helmet Device (Safe2Go)</b><br><i>Arduino/ESP32, GPS, GSM, Impact &amp; Vibration Sensors</i>                                                                                                                                                                                                                                                                                                                                                                                    | 2025 |
| <ul style="list-style-type: none"><li>Designed an IoT-based smart helmet for real-time accident detection and rider safety.</li><li>Integrated impact and vibration sensors with Arduino/ESP32 for sensor data acquisition and crash detection.</li><li>Implemented GPS/GSM modules to automatically transmit emergency alerts with the rider's location.</li><li>Optimized sensor thresholds to improve accident detection and emergency response.</li></ul>                                       |      |

## Achievements

---

- Awarded the **Dreamed STARS Scholarship** (100% Tuition Fee Waiver) at VIT Bhopal.
- Secured **1st Rank** in the District Merit List in Class XII.
- Winner of the **Shikshalokam Hackathon** (February 2026).
- Winner of the **FyrestGen Hackathon** by VIT-AP (September 2025).

## Coding Profiles

---

- LeetCode:** 550+ Problems Solved    **GeeksforGeeks:** 350+ Problems Solved
- 365 Days of DSA:** GitHub – 240+ Consecutive Days of DSA Practice
