PROJECTS

IoT Based Smart Helmet Device(Safe2Go)

2025

- Designed a smart safety helmet with IoT sensors for accident detection and rider protection.
- Integrated impact sensor and vibration module to detect crash events in real-time.
- Implemented GSM/GPS module for automatic emergency alert messaging with live location.
- Used microcontroller (Arduino/ESP32 — tell me which one you used) to control sensor data acquisition and communication.
- Improved response time of emergency alert system through optimized sensor threshold tuning.
- Demonstrated prototype for smart transport and rider safety applications.

Simple Calculator (Web Based)

2025

- Developed a fully functional calculator using HTML, CSS, and JavaScript, supporting arithmetic and functional operations.
- Added interactive button handling and clean user interface design for better accessibility.
- Strengthened understanding of DOM manipulation, event handling, and client-side logic..

ACHIEVEMENTS

- Awarded With the Dreamed **STARS Scholarship** (100% fees concession) from VIT Bhopal University.
- Secured **first position in district merit** list in class 12th
- Won the Shikshalokam Hackathon Invoked feb 2026
- Won the FyrestGen Hackathon by VIT-AP sep 2026
